

VILLAGE OF COPEMISH
WINTER SNOW PLOWING

All items that are on the edge of the roads must be moved before the snow flies. We need a minimum of **4 feet from the edge of the pavement** to properly plow and not cause damage to residents property or the plow truck. We will NOT plow the side where any items are setting too close to the edge of the road. We will do our best to keep the roads clear of snow if you keep them clear of items.

Thank you,

Maintenance Department
